Tools You May Need

- Drill
- Pencil
Power Kit Installation

- If you have the mechanical chime in your home, start from Step 1 here.
- If you have the electronic chime in your home, please refer to its manual for detailed operations.
- If you do not have any chime, skip power kit installation and follow the Option B in page 5.

1. Shut off the electricity at the breaker that controls doorbell's circuit.

2. Insert one end of the wire harness the power kit.

3. Remove the cover from your mechanical chime.

4. Remove the existing chime wires in the terminals named TRANS and FRONT.
5. Connect the wire harness to the chime's terminals named TRANS and FRONT.

6. Insert the existing chime wire and the other end of the wire harness into the wire connector and twist it tightly. Repeat this step with the other chime wire.

7. Mount the power kit to the side of the chime.

8. Put back the chime cover.
1 Shut off the electricity at the breaker that controls doorbell's circuit.

2 (Optional) Paste the plate foam to the mounting plate.

3 Insert the mini-level into the mounting plate and mark the drill points when its bubble stays in the middle.

4 Drill holes according to drill points and insert anchors.

5 Fix the mounting plate to the wall.

Remove the mini-level when drill points are marked.

Use the plate foam when your wall is uneven.
6. If power kit is installed, follow Option A; If not, follow Option B.

**Option A** Connect doorbell with your existing doorbell wires.

**Option B** Connect the fuse wire with your existing doorbell wire.
7 Fix the doorbell to the mounting plate by inserting the doorbell screws.

8 Restore the electricity at the breaker.

Doorbell Screw

Doorbell is powered on when its indicator flashes blue quickly. If not, make sure your electricity is off and check the wiring. If yes, proceed to doorbell setup.

9 Add to Alula app.

- Add a camera to the Alula app
  - Log in to your account using the Alula app.
  - From the Alula app Camera screen, tap “+” on the upper-right hand corner to go to the scan QR code interface.

- Scan the QR Code on the bottom of the camera.
- Enter the verification code located on the bottom of the camera.
- Follow the app wizard to finish Wi-Fi configuration.

If you want to change your camera's Wi-Fi, press and hold the reset button for 10s and repeat this part.
10. Put the faceplate back and insert two security screws into the bottom of the doorbell to secure the faceplate.
